WEB DEVELOPMENT	HTML, CSS, Javascript, jQuery, Bootstrap, Ajax, JSON, Grunt/Gulp, NodeJS, Bower
JAVA	Java 6/7/8, Spring, Hibernate, Gradle
LAMP	PHP, Drupal, Wordpress, Apache, MySQL, Symfony
DATABASES	MySQL, Microsoft SQL Server, PostgresSQL

EXPERIENCE

FastBridge Learning

Software Engineer   Jun 2015 - Present

FastBridge Learning creates products for and with teachers. It offers the only comprehensive assessment system with both Curriculum-Based Measures (CBM) and Computer-Adaptive Tests (CAT) to screen, diagnose, monitor and inform instruction faster—when you need actionable data—so you spend less time testing or guessing and more time teaching.

University of Minnesota

Software Engineer - Graduate Research Assistant   Jan 2014 - May 2015

Worked with the Dept. of Education Psychology while pursuing my MS. I was working with a small team of researchers and computer scientists to develop better assessments for K-12 students, delivered via a web app. The technology stack was Spring MVC with Hibernate, Microsoft SQL Server, Tomcat on AWS servers and HTML/CSS with JavaScript and jQuery for frontend

- Developing software for new assessments.
- Creating reports from the data collected for the researchers as requested.
- Mentoring new recruits.
- Creating web based reports for schools and teachers to track the progress of their students.

Unique Identification Authority of India, Government of India

Software Engineer   Dec 2011 - Jun 2012

UIDAI is the agency behind Aadhaar - an initiative of the Government of India to provide all residents with a unique identification number that can help with various welfare programs.

- Worked with a team of Software Developers from Accenture and CMC Ltd as part of the software development team for the Mumbai regional office of UIDAI and then as part of the End To End process testing team.
- Created a web application for internal reporting purposes.
- Created a de-duplication software suite that included the main program used to detect duplicates among new enrolments in the Aadhaar program and the Aadhaar cards already generated.
- The suite also contained a web app for manual de-duplication and for displaying the results of the de-duplication efforts.
- Wrote multiple programs used to track processes for end to end testing and streamlining of the Aadhaar processes.

Whackk!

CTO/Co-Founder   Jun 2010 - May 2015

Whackk! is an online e-magazine for the youth of India that is run, managed and maintained by people who are

Whackk! is an online e-magazine for the youth of India that is run, managed and maintained by people who are not a bunch of old farts and aspire for Whackk! to be considered young India's mouthpiece.

- Developed an Android application for the website, available on the Play Store.
- Developed and deployed three versions of designs with Drupal CMS. The latest design as mobile first and completely responsive.
- Manage a team of almost 40 voluntary contributors.
- Used various means and best practices to increase the performance and usability of the site.

EDUCATION

University of Minnesota

Aug 2013 - Present

Master - Computer Science

University of Mumbai

Jul 2008 - May 2013

Bachelor - Information Technology
